## Platform North

National transport plan projects

Storymap Demo - Corridor 1 Narvik-Luleå-Joensuu

March 11, 2026

# Creating a map solution for Platform North

- Part of the prioritized measure: Joint Transport plan
- The first interactive map collaboration for transport in the North
  - Norway
  - Sweden
  - Finland
- All three countries have good national map solutions
  - Making something together is different and a new story
- Sharing tasks, collecting basic data and creating end-products

# The interactive map for Platform North

- No static images
  - Zoom, pan and clickable elements
- Sharing data in a common interactive map
- Enable storytelling about important transport topics through storymaps
- Gives valuable cross-border insight
  - Can add value to the national transport planning

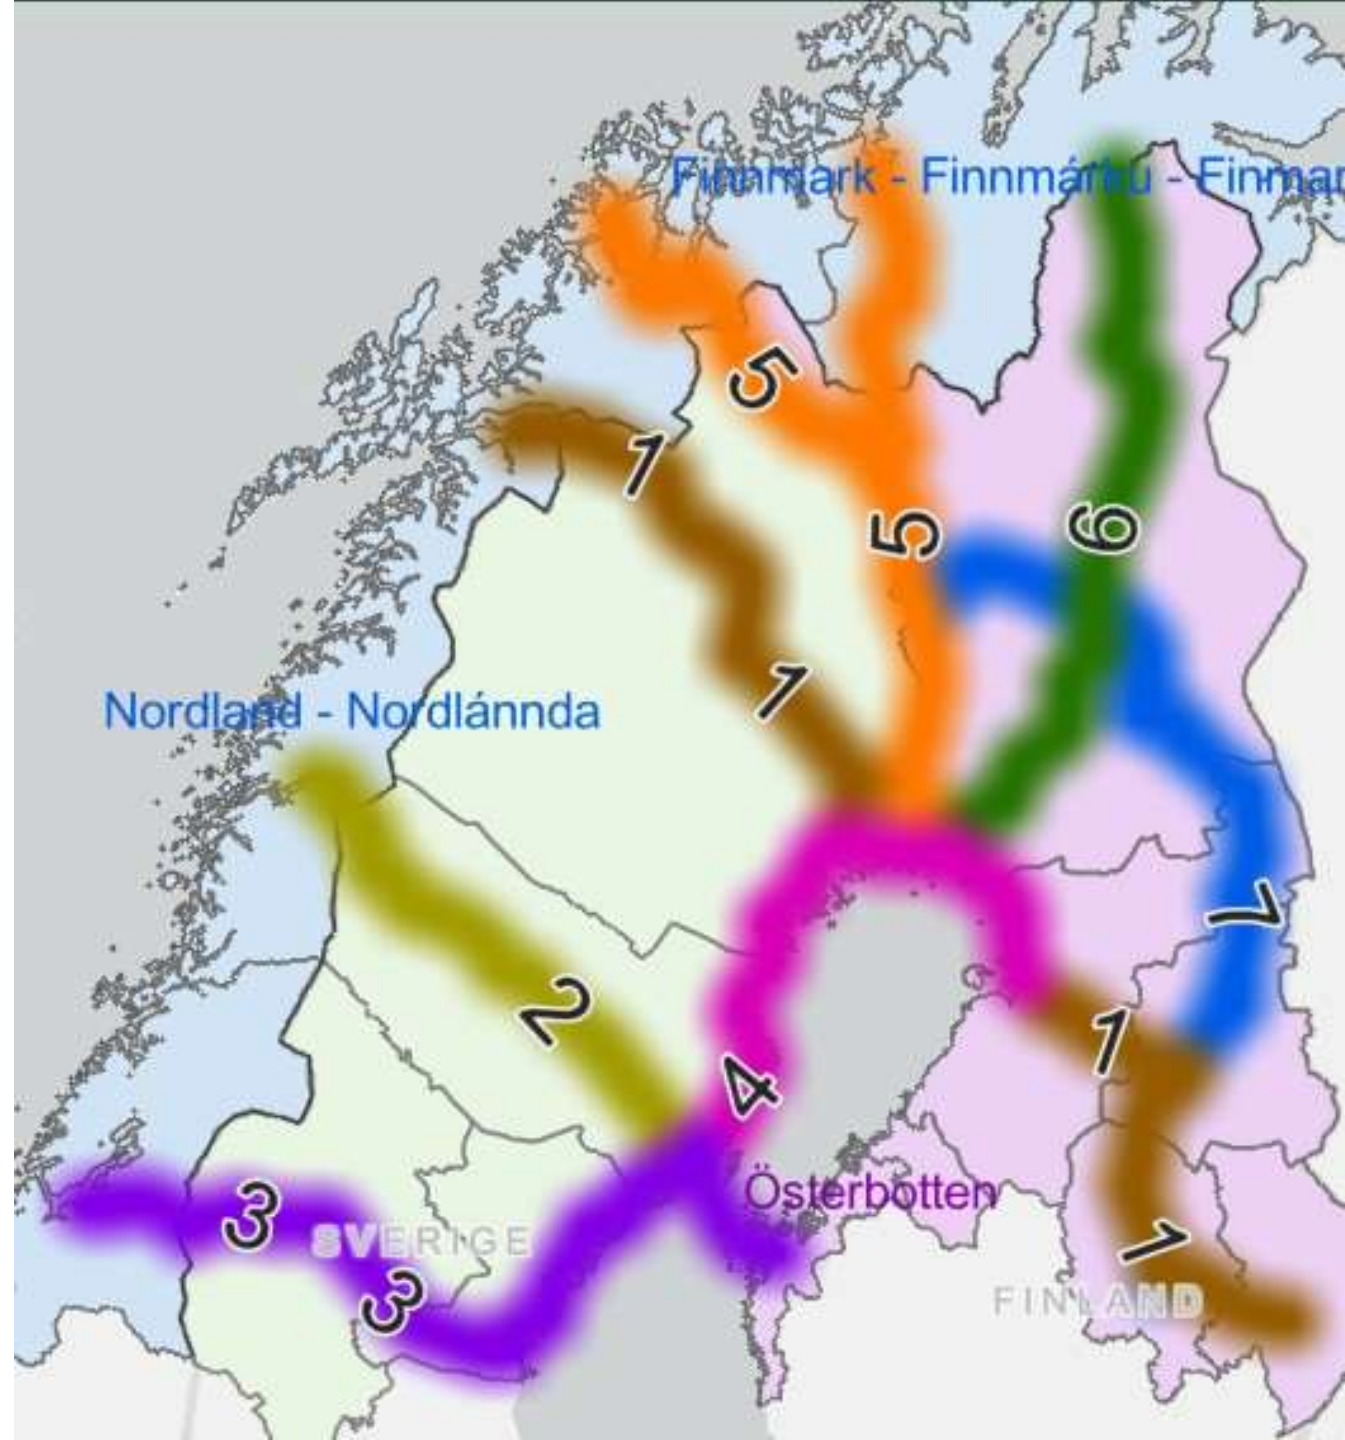

Platform **North**

# Viewing national transport plan projects

- 13 year since Joint Barents Transport Plan
- Seeing national transport plans in context across our three countries provides an overview that we have not had before

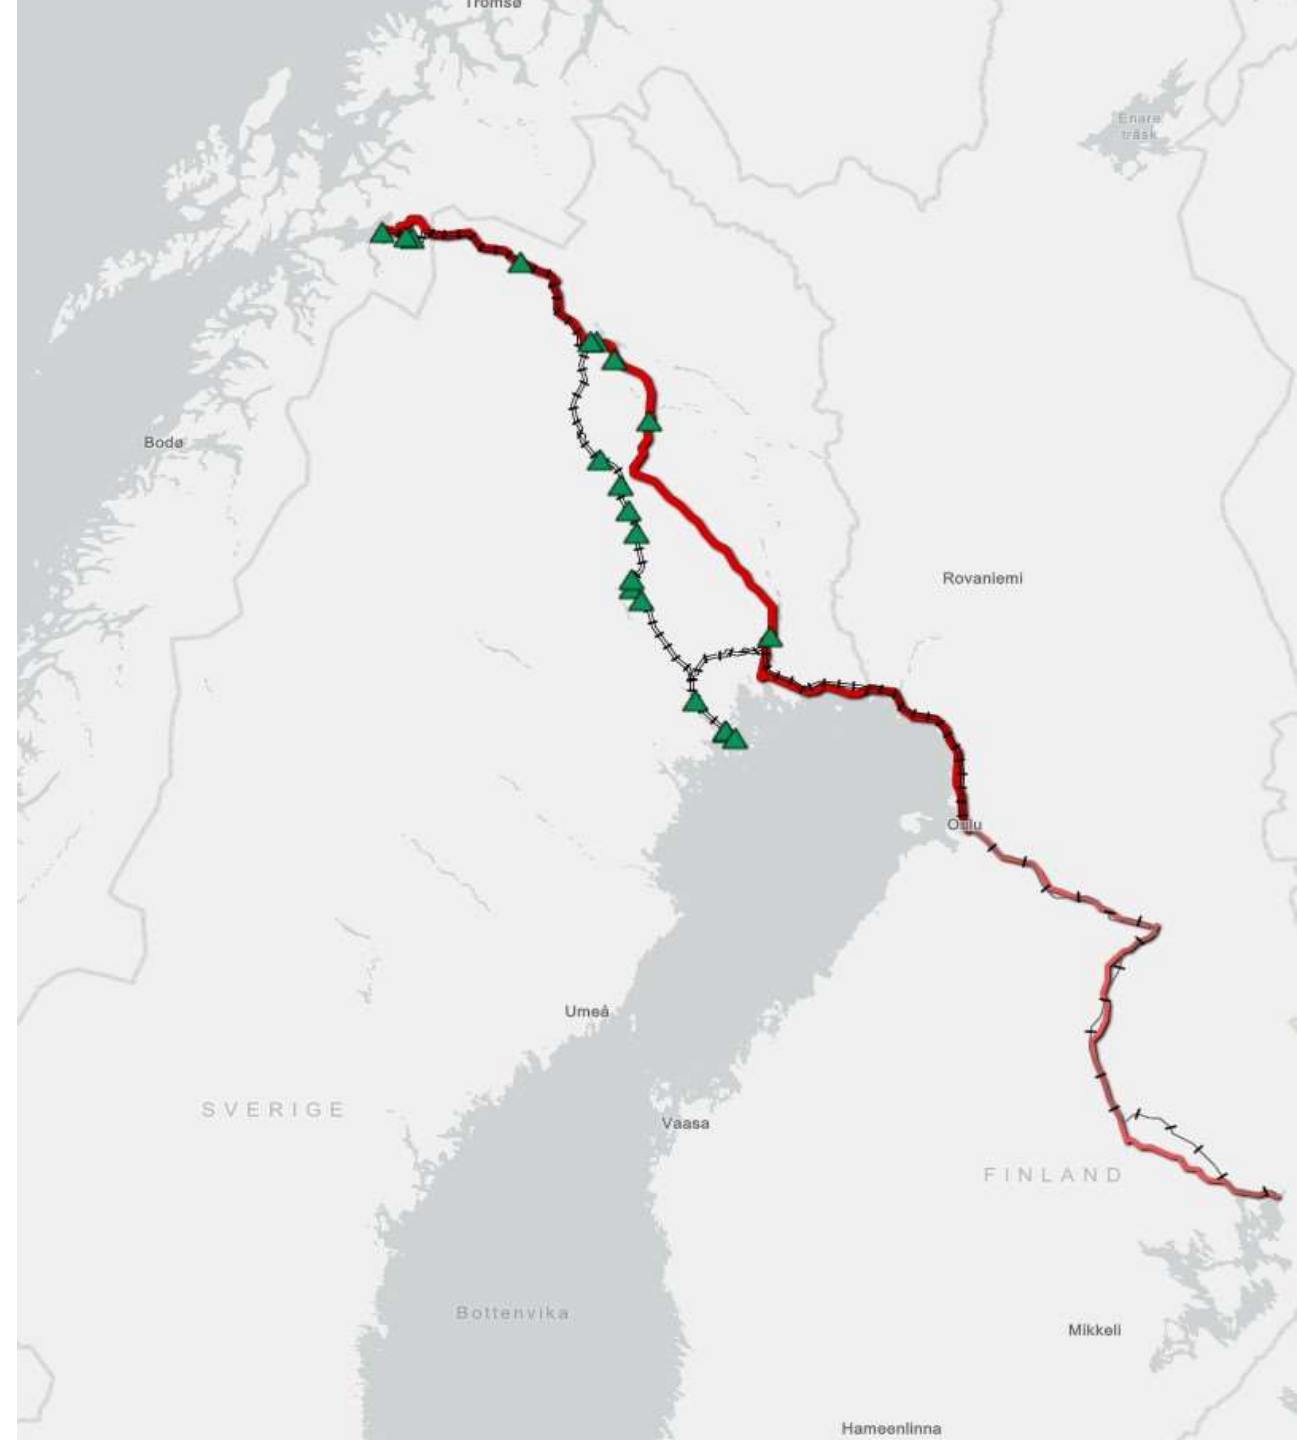

Platform **North**

# Storymap demo

- The demo is on the Corridor 1 Narvik-Luleå-Joensuu
- Data collected from the three countries on NTP projects
- The symbols are possible to click into, for more information
- The storymap also tells a story and add further value than just a map
- We are now looking at a continuation for this storymap, to include more corridors.
